

MIURA: AUTOMATIC XY CUTTER

APPLICATION: Automatic XY Cutting of self-adhesive vinyl for walls decoration

CUSTOMER: Ato Srl - Italy

INDUSTRY: Digital Printing

"WITH MIURA WE CUT WIDE FORMAT GRAPHICS IN A VERY SHORT TIME!"

"Since we have been working with the Miura cutter we have optimized the cutting process of printed rolls" says Paolo Miramondi of the company Ato Srl of Cesano Boscone (Milan).

Ato Srl has been operating for more than twenty-five years in the field of wide format and high quality digital printing, producing flexible, rigid and semi-rigid materials for visual communication, plexiglas® supports and signs.

The company prints large volumes of self-adhesive vinyl to decorate large walls of **gyms, kindergartens, schools and shops**.

In order to respond quickly to the delivery of this material Ato needed to **speed up the cutting of the printed rolls**: "Before we trimmed by hand meters of rolls, taking a long time to make the precise cut" says Paolo Miramondi and continues:

"Today with the purchase of Miura we solved this problem! The machine **automatically cuts laminated wide format graphics in a very short time printed on a self-adhesive vinyl roll**; all of this **always with the utmost precision and without waste of material!**"
