

GLASS 170

LAMINATOR FOR RIGID SUBSTRATES WITH INTEGRATED CONTACT CLEANING SYSTEM

Professional laminator designed to apply pressure sensitive films on rigid substrates (glass, wood, steel..).
Suitable when it is required to remove dust from the surface before laminating it with film.

> CLEAN & LAMINATE

Professional laminator equipped with integrated **contact cleaning system** and an antistatic bar that allow to apply pressure sensitive films to plates that need to be cleaned before laminating

> EXCELLENT RESULTS

Dust is removed from the surface thanks to the contact cleaning system that removes dust from the plate (max. cleaning area 1625 mm/ 3582 ft)

> TIME SAVING

Two operations in one passage: the **"in-line" cutting unit** allows to trim the film if wider than the plate when the machine is working

APPLICATIONS:

- Glass plates
- Steel plates
- Panels (i.e. woods)
- Plexiglas®
- Many more..

Example of **application of anti-fog film** on the inside surface of the glass of commercial freezers to prevents fogging when a door is opened and keeping the glass transparent.

Display for rollers pressure of the cleaning system

Contact cleaning system of the substrate to laminate with antistatic bar to remove dust from the surface

Load tensioning control of the film: it keeps the same tension regardless of roll diameter (optional)

Motorized inlet roller table

Advancement control of the rigid substrate controlled by keyboard or pedal

Unwinding shaft of the film with manual adjustment

Rewinding shaft for liner with adjustable manual clutch

Antistatic rewinding dust guard between cleaning roller and laminating roller

Outlet roller table

Adjustable feet

Manual lifting of the top laminating cleaning roller and the lamination roller (motorized optional)

Cutting unit to trim the film if wider than the plate

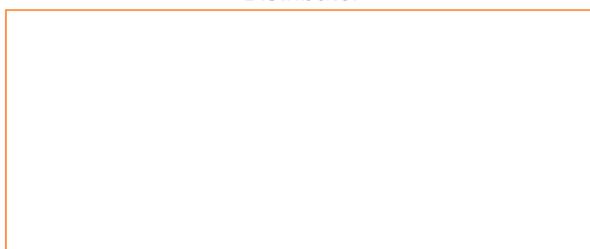

Side adjustable reference bar for the right positioning of the substrate to laminate

Sensor to stop the advancement of the plate on the outlet roller table

	GLASS 170	GLASS 110
Working width	1700 mm (67 in)	1100 mm (43 in)
Max. working thickness	60 mm (2,3 in)	60 mm (2,3 in)
Minimum dimension of plate	250 x 350 mm (9,8 x 13,7 in)	250 x 350 mm (9,8 x 13,7 in)
Max weight of plate	130 kg (286 lbs)	130 kg (286 lbs)
Max. laminating roll diameter	Ø 300 mm (11,8 in)	Ø 300 mm (11,8 in)
Heated top laminated roller	max. 60° C (140° F)	max. 60° C (140° F)
Electronic adjustable speed	from 0 to 10 m/min (from 0 to 32 ft/min)	from 0 to 10 m/min (from 0 to 32 ft/min)
Working height (± 20 mm)	900 mm (35 in)	900 mm (35 in)
Power supply	220/208 V - 50/60 Hz - 5000 W	220/208 V - 50/60 Hz - 5000 W
Dimensions (W x D x H)	2455 x 3000 x 1730 mm (96 x 118 x 68 in)	1855 x 3000 x 1730 mm (73 x 118 x 68 in)
Weight	1600 kg (3527 lbs)	1450 kg (3197 lbs)
