

F L E X A

AUTOMATION FOR SIGN MAKERS

ROAD SIGNS

A complete line of equipment for the production of road signs,
corporate safety signs and worksite signs.

EASY PLUS

SINGLE-HOT OR DUAL-HOT LAMINATOR FOR LARGE PRODUCTIONS (up to 140°C)

Application of the protective film on printed reflective rolls, application-tape and self-adhesive vinyl against wear from external agents, for high durability and a more automated production.

EASY LITE

HEAT-ASSISTED TOP ROLLER LAMINATOR FOR MEDIUM PRODUCTIONS (up to 60°C)

Application of the protective film on printed reflective rolls, application-tape and self-adhesive vinyl against wear from external agents, for high durability and a more automated production.

MNL

FLATBED APPLICATOR

Quick and precise mounting of printed reflective films, application-tape and self-adhesive vinyl on signs/panels.

MIURA
AUTOMATIC XY
CUTTER

Very fast and automated sheeting from roll to sheets (XY cutting) of printed and not printed films.

ECTR 500
APPLICATOR OF
REFLECTIVE FILMS

Applicator of reflective film on circular surfaces such as snow poles, parapetonal barriers and more.

TESI FLAG - TESIS - TGE

ROLL-SLITTERS WITH OR WITHOUT INTEGRATED REWINDER FOR ROLLS AND FILMS

A great help for **rolls slitting** of reflective films, application-tape and self-adhesive vinyl by creating rolls of **desired sizes** with no waste of material.

V
ERTICAL ROAD SIGNS
C
ORPORATE SAFE SIGNS
W
ORKSITE SIGNS

Flexa assistS, in full compliance with the current building regulations, the manufacturers of vertical road signs, corporate safety signs and worksite signs.

A **wide range of equipment**, available in different models varying on the volume of production and needs, to respond to the various construction stages of a sign: **application of the protective film** on the reflecting material, **mounting** of the printed film on the panel, manual or automated **cutting** of the reflective material.

HOT LAMINATORS (up to 140°C) and **HEAT-ASSISTED TOP ROLLER LAMINATORS** (up to 60°C) - **LAYING OF LAMINATION FILM** on printed reflective material to protect it from the weather and guaranteeing its features for a long time.

Thanks to the **hot** lamination and to our technology we are able to control **speed, temperature, material tension** (with **certified instruments**), according to the different type of material and to assure a perfect result that meets the world's producers requirements.

FLATBED APPLICATORS - MOUNTING ON PANELS of the reflective film, application-tape and self-adhesive vinyl. The application is very precise, fast and without defects, reducing the working times (ideal for the wide format signs). The panels, no matter their dimensions, do not require handling and this increases the practicality and simplicity of application, reducing the necessary work space.

For more info: <https://www.flexa.it/en/prodotti/sign/road-sign-laminators/mnl-sign>

AUTOMATIC XY CUTTER - SHEETING Increase the **productivity** thanks to the horizontal and vertical cutting of the reflective film from roll to **sheets of the desired size**.

For more info: <https://www.flexa.it/en/products/cut>

ROLL SLITTER - ZERO WASTE Rolls of **needed sizes** of reflective film, application-tape and self-adhesive vinyl are always available according to the type of signs with no waste of material.

The film stock can be considerably reduced, as maximum size reels can be kept in stock and can be cut at the moment.
